

IEC62368-1 : 2014 is pending now!

According to the conference agreement between European Union and Celelec, EU will announce to postpone the mandatory implementation date of EN 62368-1: 2014 for 18 months in next official journal. Therefore, the mandatory date will be extended from June 20, 2019 to December 20, 2019.

Nowadays, the application of diversified technologies leads people think out of the box to create new generations of products. IEC 62368-1 not only strengthens innovative design but also introduces the concept of hazard-based safety engineering (HBSE) which also been known as people-oriented design.

Magic power is aware that IEC 62368-1 is bound to become the development trend of technology industry. As a result, our follow-up design will be introduced the new concept of HBSE into product development process. In additional, the existing products will also be expediting the update process to integrate the new security standard so as to fulfill market demands.
