

Product News-

3 x 5" 500W PSU

Samples Available!

Safety Applying!

MPI-G500

- 3 x 5" AC/DC open frame
- Fan-cooled 500W power/convection 300W
- 12V, 24V OPV available & optional +5VSB@2A
- Up to 95% efficiency
- Safety 62368-1 Applying & Design to meet 60335
- No load power <0.5W

[Contact Us for More Detail!](#)

MPI-G500 is our new released model up to 500W with high power density. It could be operated in wide temperature range from -20°C to +80°C. Our new L-shape chassis design will dissipate heat through the side directly, which can also enhance the reliability and derating status of the PSU. With the heat dissipation advantage, this model could achieve energy transition 95% effectively. Overall, this model will satisfy instruments that require high output but with limited space; the application of this model includes household instrument and industrial utilization.

For flexible mechanical concept, we also design two optional formats except open frame. Type with fan and with cover are available as the picture below.

With Fan

With Cover
